*Bloodwork required for all animals over 5 for spay/neuter, all specialty and all dentals

Signature: _____

I am the owner or the authorized agent for the owner of the animal described above, and I have the authority to execute this consent. My signature below certifies that I am over eighteen years of age.

I have been informed that there are certain risks and complications associated with sedation, anesthesia, and/or any operation/procedure and that the risks/complications have been explained to me. I further understand that during the course of the operations or procedures, unforeseen conditions may arise that may necessitate the performance of additional procedures deemed necessary by the veterinarian. I am encouraged to discuss any concerns I have about these risks with the attending veterinarian before the procedure is initiated. I have been informed that there are risks associated with the use of any medication.

I authorize the staff to fix a hernia on my animal if there is one present (umbilical - \$75, inguinal - \$150). I also authorize them to remove any deciduous teeth the animal has that could lead to future dental issues (\$20).

The nature of these operations or procedures has been explained to me and I understand what will be done. I am aware that the practice of veterinary medicine is not an exact science and, thus, there are no guarantees for successful treatment. I have been encouraged and given the opportunity to discuss any questions I may have regarding my pet's medical care and my questions have been answered to my satisfaction. I accept that my financial obligations remain regardless of the outcome and do not hold SNIP Society, NFP liable for any issues before, during or after surgery. I also understand that SNIP Society, NFP may not be open or available to fix any post-op surgical issues and the financial cost of this is my own.

I have read and understand this authorization and hereby accept and agree to the terms of the consent for treatment.

POST-OP INSTRUCTIONS

Do not let your pet interact with other pets at home after surgery.

Restrict activity for 14 days. No rough play, running or jumping. Too much activity can cause the surgery site to become open or swollen. No long walks - keep your dog on a leash

We recommend wearing an e-collar for 14 days after surgery. Licking the incision site can cause infection.

Pain meds - Please finish all pain meds you have been given

Surgical Site - Stitches are dissolvable. A small, green tattoo has been placed near the surgery site.

Food & Water - You can offer your pet $\frac{1}{3}$ of the normal food and water 2 hours after returning home from surgery. They can eat normally the day after surgery. It is not uncommon for a pet to not eat the day of surgery.

Note: SNIP Society cannot be held responsible for any postoperative complications due to non-compliance. Improper post-operative care can lead to complications and require additional care to remedy the issue.
